ABOUT CONFERENCE

TRANSCOM, International Scientific Conference on Sustainable, Modern, and Safe Transport, aims to establish and expand international contacts and cooperation.

The main purpose of the conference is to provide young scientists with an encouraging and stimulating environment in which they can present the results of their research to the scientific community. The conference has been organised regularly every other year since 1995. Between 160 and 350 young researchers and scientists regularly participate in the event.

The conference papers will be published in a dedicated issue of Transportation Research Procedia, an open-access, online scientific journal published by Elsevier. Following its online publication, the issue will be submitted for indexing by SCOPUS.

The publication of submitted papers in the proceedings is subject to their presentation at the conference.

The venue of the TRANSCOM 2025 conference is the [Grand Hotel Bellevue High Tatra Mountains, Slovakia](#).

The conference is organised under the auspices of the Rector of the University of Žilina.

In its more than 70 years of successful existence, it has become the alma mater for more than 91,000 graduates, highly skilled professionals specialising mostly in transport and technical fields as well as in management, marketing, and humanities.

Employers who collaborate with the University in the recruitment process continually express interest in employing our graduates, thus proving their quality and readiness for practice.
